PROFILE

Software Engineering graduate and MS Artificial Intelligence student with hands-on experience across machine learning, data analytics, SQL, data warehousing, and software development. Currently building practical AI experience as an AI Intern while developing end-to-end projects in Python and Scikit-learn.

EXPERIENCE

AI Intern · Analytix Camp

Currently developing practical AI and data-science skills through hands-on machine-learning and analytics work.

Technical Support Associate – NOC · PTCL

Worked in fixed-line network support and operations, using network management and monitoring environments and troubleshooting workflows.

Frontend Developer / Software Tester · Goringo Private Limited

Contributed to frontend development and software testing for a UK-based eSIM/connectivity mobile application.

EDUCATION

MS Artificial Intelligence · COMSATS University Islamabad, Wah Campus · In progress

BS Software Engineering · COMSATS University Islamabad · 2024

SELECTED PROJECTS

Customer Churn Prediction

Python, Pandas, Scikit-learn, Random Forest — classification workflow for predicting bank customer churn.

Order Prediction Application

Python, NumPy, Scikit-learn, Matplotlib — Linear Regression workflow for practical order forecasting and visualised results.

SQL Data Warehouse

SQL Server, SSMS, ETL — CSV-to-warehouse pipeline using Bronze, Silver, and Gold Medallion Architecture.

365 Ventures / 360 Store Analytics

SQL Server and DQL — business analysis across 60,000+ retail sales records using joins, grouping, CASE, and date functions.

AdventureWorks Analysis

SQL Server — business-oriented relational analysis using joins, CTEs, subqueries, filtering, and aggregation.

Learning Management System

React Native, Expo, Firebase, Firestore, AsyncStorage — mobile LMS with cloud-backed course content and session handling.

TechNest — MERN E-Commerce

MongoDB, Express, React, Node.js — team project with frontend, UI/UX, documentation, UML, and incremental delivery.

Mobile UI Kit

React Native, Expo, Figma — reusable mobile interfaces translated from a Figma UI kit.

TECHNICAL SKILLS

AI / ML: Python, Pandas, NumPy, Scikit-learn, Random Forest, Linear Regression, supervised learning, model evaluation

Data: SQL Server, SSMS, DQL, ETL, CTEs, joins, aggregations, data warehousing, Medallion Architecture, Plotly, Matplotlib, Streamlit

Software: React Native, Expo, Firebase, Firestore, Node.js, MongoDB, Express, JavaScript, Figma, software testing

Training: CCNA v7 training · Microsoft Azure training · Analytix Data Science Bootcamp

RESEARCH INTERESTS

Deep learning, computer vision, generative AI, explainable AI, natural language processing, and applied AI.

Portfolio: AI & data-focused work with a practical software-engineering foundation.
