

MUHAMMAD AWAIS

AI Intern · MS Artificial Intelligence Student · Software Engineering Graduate
Pakistan | Awais619261@gmail.com | +92 332 979 9920 | Portfolio: www.awais.website
LinkedIn: [linkedin.com/in/awaismuhammad-ai](https://www.linkedin.com/in/awaismuhammad-ai) | GitHub: github.com/Awais61926

PROFESSIONAL SUMMARY

Software Engineering graduate and MS Artificial Intelligence student with hands-on experience in Artificial Intelligence, Machine Learning, Data Analytics, Data Science, SQL, Python, and software development. Currently working remotely as an AI Intern at Analytix Camp. Recent work includes revenue and occupancy analysis for 365 Hotels & Resorts, commercial analytics for 365 Emirates Pharma, SQL data warehousing, predictive modeling, and Retrieval-Augmented Generation (RAG).

TECHNICAL SKILLS

AI / ML: Python, Pandas, NumPy, Scikit-learn, Regression, Classification, Random Forest, Model Evaluation, Matplotlib, Plotly, Streamlit, RAG, Embeddings, Vector Search, LLMs, NLP, Generative AI

Data / SQL: SQL Server, SSMS, SQL Querying, DQL, ETL, Data Warehousing, Medallion Architecture, CTEs, Joins, Aggregation, Subqueries, Data Cleaning, Data Transformation, EDA, Business Analysis, KPI Analysis

Development / Tools: React Native, Expo, Firebase, Firestore, Node.js, MongoDB, Express.js, JavaScript, HTML, CSS, Figma, Git, GitHub, Jupyter Notebook

Networking: NOC Operations, Network Monitoring, Troubleshooting, TCP/IP, LAN/WAN, VPN, DNS, DHCP, DSL, GPON, SolarWinds, ZTE, Huawei, Nokia

PROFESSIONAL EXPERIENCE

AI Intern — Analytix Camp

Remote | Present

- Build and evaluate supervised-learning models in Python and Scikit-learn across regression and classification workflows.
- Perform data cleaning, preprocessing, exploratory data analysis, feature preparation, visualization, model training, validation, and evaluation.

Technical Support Associate, NOC — PTCL

Pakistan | January 2025 – Present

- Monitor fixed-line network operations using SolarWinds and multi-vendor infrastructure across ZTE, Huawei, and Nokia systems.
- Diagnose, isolate, escalate, and resolve service faults within structured NOC troubleshooting and SLA-driven workflows.

Frontend Developer / Software Tester — Goringo Private Limited

UK-based eSIM / Connectivity Platform

- Implemented frontend features for a UK-based eSIM and connectivity mobile application using React Native and Expo.
- Tested application functionality and usability, identified defects, and supported debugging and interface refinement.

SELECTED AI & DATA ANALYTICS PROJECTS

RAG Knowledge Chatbot — Python · RAG · Embeddings · Vector Search · LLM

- Built a retrieval-augmented chatbot workflow using document ingestion, semantic retrieval, context injection, and grounded answer generation.

365 Hotels & Resorts - Revenue & Occupancy Analysis — Python · Pandas · NumPy · Matplotlib · Seaborn

- Analyzed hotel, room-class, booking, date, and booking-channel data; calculated occupancy, ADR, RevPAR, realization rate, length of stay, platform performance, cancellations, and guest-rating patterns.
- Built reusable data-cleaning, transformation, aggregation, and visualization workflows for management-oriented findings.

365 Emirates Pharma - Commercial Data Analytics — Python · Pandas · NumPy · Matplotlib · Seaborn

- Analyzed pharmaceutical sales and operational data across revenue, margin, pricing, inventory, supply, and customer performance.
- Built analyses for gross margin, therapeutic categories, discount leakage, MOH price-ceiling compliance, returns, expiry risk, fill rate, sales-force performance, customer concentration, and Ramadan demand.

Customer Churn Prediction — Python · Pandas · Scikit-learn · Random Forest

- Built an end-to-end classification pipeline for bank customer churn covering data cleaning, encoding, feature preparation, model training, benchmarking, and evaluation.

E-Commerce Daily Orders Predictor — Python · NumPy · Scikit-learn · Streamlit

- Built and deployed a Linear Regression application forecasting daily order volume from visitor traffic, advertising spend, discount percentage, and weekend indicators.

SQL Analytics & Data Warehouse — SQL Server · SSMS · ETL · CTEs · Medallion Architecture

- Built a Bronze/Silver/Gold SQL data warehouse and performed business analysis across 365 Ventures / 360 Store and AdventureWorks datasets using joins, CTEs, subqueries, aggregation, filtering, CASE logic, and trend analysis.

EDUCATION

MS Artificial Intelligence - COMSATS University Islamabad, Wah Campus | In Progress

BS Software Engineering - COMSATS University Islamabad | 2024

TRAINING & CERTIFICATIONS

Data Science with AI Bootcamp - Analytix Camp | CCNA v7 Certification | Microsoft Azure Training
